

## How to Burn a DVD from iDVD

1. Open iDVD. Go File to New. Type in a Title and save to the Desktop with the Aspect Ratio Standard. This should be the same ratio that your iMovie project was created.
2. Choose the Theme
3. Drag “your movie.mov” into the iDVD window under the title. Go to **Project**, to **Project Info** to view the progress of the importing of the movie into iDVD. It will show the progress under Encoding.
4. When complete, change the name of “your.mov” that you dragged into iDVD under your title, to PLAY.
5. Go **File** to **Save as Disc Image**. Save the .img on the Desktop.
6. If you do not have the option to burn on your computer, plug in the external DVD burner. Insert a DVD. In the next window select Open Disc Utility. Select “your movie.img” in the column on the left. Click the Burn icon. If it does not show up in the column, select burn then navigate to the file. The DVD setting should be TSSTcorp CD/DVDWSH-5182M. If you can burn on your computer, open Disc Utility and either select the file or navigate to it then burn
